Re: Partner Support for Clean Water Fund's (CWF) *ReThink Disposable* Program

Dear Councilmembers:

On behalf of the NOAA Marine Debris Program (MDP), I am writing to express our support for Clean Water Fund's project proposal to the California Ocean Protection Council to create an "Unpackaged Community" demonstration project in the San Francisco Bay Area. Since 2011, Clean Water Fund's California office has been a leader in addressing plastics in the marine environment through public education and engagement and creating partnerships with businesses, institutions, and local government to reduce single use products, the primary component of street litter that pollutes our waterways, the bay and the ocean. **Over the last two years, *ReThink Disposable* has engaged 112 food businesses and five institutions to implement best management practices leading to a reduction of over 10 million disposable packaging products annually and preventing approximately 100,000 pounds of waste each year.**

The NOAA MDP is partnering with Clean Water Fund on *ReThink Disposable* through our Fiscal Year 2015 Prevention through Education and Outreach Grant Opportunity. The MDP is mandated by the Federal Marine Debris Act to "identify, determine sources of, assess, prevent, reduce, and remove marine debris and address the adverse impacts of marine debris on the economy of the United States, marine environment, and navigation safety." *ReThink Disposable* supports our mission to reduce marine debris by addressing the generation of litter prone trash at the source. This grant would provide much needed funding to elevate the impact and visibility of this campaign by creating a "model unpackaged community" that take an all hands in approach to reduce single use packaging. The results, resources, tools, case studies, and community volunteer training program with supporting materials will serve as a model for other cities and counties to utilize and replicate as they work to mitigate the environmental and financial burden of managing trash that pollutes California's waterways.

We know that with Clean Water Fund's leadership, the proposed *ReThink Disposable* project will be a success in raising awareness of the environmental impacts from the "throwaway lifestyle" to inspire behavior change amongst businesses, intuitions, and the public. I urge you to fund the proposal of the Clean Water Fund. Should you have any questions about our support for this proposal, please contact our California Regional Coordinator, Sherry Lippiatt at sherry.lippiatt@noaa.gov and 510-410-2602.

Sincerely,

Nancy Wallace
Chief, Marine Debris Division

Dear Councilmember:

Clean Water Fund (CWF) applied for and received a competitive US EPA San Francisco Bay Water Quality Improvement Fund grant on September 1, 2012 for \$257,293. CWF successfully completed all work plan objectives and closed the grant December 31, 2014.

If you have any questions, feel free to contact me at yelensky.ERICA@epa.gov or 415-972-3021.

Sincerely,

Re: Partner Support for Clean Water Fund's (CWF) *ReThink Disposable* Program

Dear Councilmembers:

The City of San José Environmental Services Department is pleased to support CWF's project proposal to the California Ocean Protection Council to create an "Unpackaged Community" demonstration project in the San Francisco Bay Area. We believe in and support the mission of Clean Water Fund's *ReThink Disposable* program to reduce marine debris by addressing the generation of litter prone trash at the source. Environmental Services is interested in continuing our partnership with Clean Water Fund because source reduction has the potential to effectively reduce the quantity of trash that ends up on city streets and in local waterways and reduces costs related to trash management and control.

Trash reduction and control are key priorities for the City of San José's Stormwater Management and Zero Waste Programs. As part of our program for complying with the trash reduction provisions of the Municipal Regional Stormwater Permit, the City of San Jose recognizes *ReThink Disposable* as an innovative way to control, reduce, and ultimately eliminate discharge of trash. This grant would provide much needed funding to elevate the impact and visibility of this campaign by creating a "model unpackaged community" that takes an all hands in approach to reduce single use packaging. The results, resources, tools, case studies, and community volunteer training program with supporting materials will serve as a model for other cities and counties to utilize and replicate as they work to mitigate the environmental and financial burden of managing trash that pollutes California's waterways.

We know that with Clean Water Fund's leadership, the proposed *ReThink Disposable* project will be a success in raising awareness of the environmental impacts from the "throwaway lifestyle" to inspire behavior change amongst businesses, institutions, and the public. The continuation of our partnership with Clean Water Fund will allow them to build on the success of their pilot project in San José. I urge you to fund Clean Water Fund's *ReThink Disposable* Program proposal. Should you have any questions about our support for this proposal, please contact Sharon Newton at sharon.newton@sanjoseca.gov and (408)-793-5351.

Sincerely,

NAPP FUKUDA
Deputy Director, Watershed Protection
Environmental Services Department

Dear Councilmembers:

On behalf of StopWaste, I am writing to express our support for CWF's project proposal to the California Ocean Protection Council to create an "Unpackaged Community" demonstration project in the San Francisco Bay Area. Since 2011, Clean Water Fund's California office has been a leader in addressing plastics in the marine environment through public education and engagement and creating partnerships with businesses, institutions, and local government to reduce single use products, the primary component of street litter that pollutes our waterways, the bay and the ocean. **Over the last two years, *ReThink Disposable* has engaged 112 food businesses and five institutions to implement best management practices leading to a reduction of over 10 million disposable packaging products annually and preventing approximately 100,000 pounds of waste each year.**

StopWaste is partnering with Clean Water Fund on *ReThink Disposable* because the project supports the work of *Alameda County's Source Reduction and Recycling Plan: Vision 2010: 75% and Beyond* which promotes source reduction and the use of reusable, recyclable or compostable food service ware and related packaging while also reducing marine debris by addressing the generation of litter prone trash at the source. This grant would provide much needed funding to elevate the impact and visibility of this campaign by creating a "model unpackaged community" that take an all hands in approach to reduce single use packaging. The results, resources, tools, case studies, and community volunteer training program with supporting materials will serve as a model for other cities and counties to utilize and replicate as they work to mitigate the environmental and financial burden of managing trash that fills our landfills and pollutes California's waterways.
