A. Purpose and Description of Service

The California Ocean Protection Council (OPC), through the State Coastal Conservancy, is seeking a qualified Contractor to evaluate the OPC's performance to date against the goals of the California Ocean Protection Act (COPA) and the 2006 Strategic Plan and to identify opportunities to improve institutional processes and strategic goals.

1. Background

The OPC was established pursuant to the requirements of the [California Ocean Protection Act](#) (COPA) that was signed into law in 2004 by Gov. Arnold Schwarzenegger. The OPC's mission is to ensure that California maintains healthy, resilient, and productive ocean and coastal ecosystems for the benefit of current and future generations.

The OPC enabling legislation envisioned a unique role for the organization in integrating and coordinating the state's laws and institutions responsible for protecting and conserving ocean resources through: (i) improved institutional processes; (ii) changes to state and federal policies and laws; and (iii) better use of scientific information to inform decision-making. The expectation is that such changes will yield greater effectiveness in ocean stewardship and improved efficiency in the use of public and private funds for this purpose.

In its first five years, the OPC has made significant contributions to improved ocean and coastal management that has been guided by the 2006 five-year strategic plan. Now, as the organization begins preparations for the next strategic plan, it is an opportune time to evaluate its performance to date against the goals of COPA and to identify opportunities to improve institutional processes, address the adequacy of policies and laws, and to integrate science into decision making.

2. Scope of Work

The OPC seeks the services of a Contractor for an approximately six-month contract to conduct an assessment of achievements to date and recommend how best to align the OPC's future activities, actions, and strategies with the intent and purpose of COPA. The study should provide practical recommendations to help guide the next phase of the OPC's work.

The Contractor will be asked to:

1. Assess OPC's activities and accomplishments to date. This will include the OPC's overall portfolio and allocation of funding, resources, and staff time to items within this portfolio.
 - What are the key policy and funding decisions made by the OPC to date?

- To what extent have these actions measurably advanced the goals of COPA or affected key policy and legislative issues at the state and federal level since the OPC's inception in 2004?
 - What lessons can be learned from these efforts that could improve the OPC's future efficiency and effectiveness? For example, how has the OPC interpreted its mandate under COPA? Do opportunities exist for building upon or augmenting past efforts in ways that will most strategically advance COPA goals? Alternatively, do opportunities exist to modify or eliminate less effective investments of staff time or funding?
 - Is the OPC's past portfolio of expenditures and actions a balanced and appropriate match to the COPA mandate? How have these expenditures and actions addressed the strategic plan?
2. Assess OPC's present systems, metrics, structures, and processes and their relative efficiency and effectiveness – including aspects of OPC collaboration and constituency engagement, balance and transparency, capacity, and public perception.

2a. Metrics and performance criteria

- What clear and objective criteria could be used to measure both successes and areas for improvement for the organization? For example, what metrics, standards, and processes should the OPC establish in order to allow objective assessment of its effectiveness in accomplishing COPA goals and to assist OPC members and staff in making strategic choices?

2b. Collaboration and constituency engagement

- What opportunities exist for enhancing OPC collaboration with state line agencies in ways that will ensure it creates lasting improvements to ocean and coastal resource policy and management in California?
- How can the OPC best fill its unique niche in bringing together diverse parties, information, and elements to develop cooperative strategies that are both coherent and successful? How might the OPC forge more effective working relationships with federal agencies and other external collaborators?
- What are the best mechanisms for the OPC to use in routinely communicating with and providing for meaningful engagement of its constituencies, including public agencies, the state legislature, stakeholders, and the public?

2c. Balance and transparency

- How can the OPC ensure that it has balanced and transparent decision-making processes that rely upon the best available science?
- Has the OPC developed a systematic and effective way for identifying and engaging in key policy and legislative issues at the state and federal level?

- Has the OPC developed a systematic approach for identifying and securing long-term funding to advance OPC goals?
- What opportunities exist to improve the effectiveness of OPC decision-making?

2d. Capacity and structure

- How can the OPC make best use of its standing bodies and their members, including the Council itself, the OPC Steering Committee, and the Science Advisory Team?
- What types of staff capacity and institutional structures and processes does the OPC need to successfully implement COPA? What opportunities exist to augment or modify OPC capacity, structures, or processes in ways that will best advance the goals of COPA?
- How sustainable is the OPC and do opportunities exist to improve its sustainability through changing administrations?

2e. Perception among key collaborators and constituents

- How is the OPC perceived by external constituents and collaborators in terms of its role, way of doing business, and impacts?
- How can the OPC ensure it has an effective voice and is it well-positioned to catalyze change?

3. Develop specific recommendations to the OPC for improvement. The study should specify the relative priority, approximate costs when appropriate, benefits, risks, and feasibility of each recommendation. The recommendations should address the full range of issues identified in the questions above and may include suggested changes to OPC systems, structures, processes, actions, strategies, metrics, policies, and/or enabling legislation. Importantly, the recommendations must include specific suggestions for revision of the OPC strategic plan.

Study Approach

Tools and approaches used in the study to develop information may include, but are not limited to:

- Objective fact finding through document review, budget analyses, review of OPC meeting minutes, etc.
- Interviews, focus groups, and round-table discussions with key players, including OPC members, OPC and agency staff, collaborators, and constituents.
- External surveys.
- Case study analyses of policy issues and funding investments.
- Identification of functional roles and capacities.
- Creation of OPC performance metrics and the application of these metrics.

The study process must effectively and sensitively engage key OPC collaborators and constituencies (e.g., public agencies, the state legislature, private funders, and various stakeholders in the scientific, NGO, coastal, and industry communities).

3. Rates, Schedules and Reporting

The Contractor will provide services at the specific rates provided in the application budget and according to a negotiated schedule. The Contractor will provide oral, e-mail or formal reports and or agreements for each deliberative process as agreed between the OPC and the Contractor.

4. Disbursements

Disbursements shall be made to the Contractor on the basis of services rendered and costs incurred to date, less ten percent, in accordance with the approved rates and costs. Invoices may be submitted no more frequently than monthly but no less frequently than quarterly. A copy of the sample contract language for costs and disbursements is attached as Exhibit A.

If the proposed chooses to participate, the DVBE incentive is applied during the evaluation process. The total amount of funds disbursed under this contract shall not exceed \$ _____. The amount encumbered by this contract is based on the current level of funding available for the services under this contract.

The OPC shall make disbursements to the Contractor on the basis of services rendered and costs incurred to date, less ten percent, upon satisfactory progress in accordance with schedules, budgets, and other provisions of this contract, attached as exhibit ____, and upon submission of an invoice, which shall be submitted no more frequently than monthly but no less frequently than quarterly. The OPC shall disburse the ten percent withheld upon completion of all tasks to the satisfaction of the OPC and upon the submission of a final invoice.

Services shall be billed at no more than the standard billing rate for the following personnel of Contractor and its subcontractors:

Principal	\$ /hr.
Senior Associate	\$ /hr.
Associate	\$ /hr.
Administrative services	\$ /hr.

The OPC will reimburse the Contractor for direct expenses necessary to the provision of services under this contract when documented by appropriate invoices and receipts. The OPC will reimburse travel and related expenses at actual costs not to exceed the rates provided in Title 2, Division 1, Chapter 3, Subchapter 1, Article 2 of the California Code of Regulations, except that reimbursement may be in excess of these rates upon provision of documentation that rates in compliance are not reasonably available to the Contractor. Reimbursement for the cost of operating a private vehicle shall not, under any circumstance, exceed the rate specified for excluded employees in (currently \$0.55/mile) as of the date the cost is incurred. The OPC will reimburse the Contractor at cost for other necessary expenses if those expenses are reasonable in nature and amount taking into account the services provided and other relevant factors.

The Contractor shall request disbursements by filing with the OPC a fully executed "Request for Disbursement" form (available from the OPC). The Contractor shall include in the form its name and address, the number of this agreement, the date of the submission, the amount of the invoice, the period during which the work was actually done, and an itemized description, including time, materials, and expenses incurred of all work done for which disbursement is requested. The forms shall also indicate cumulative expenditures to date, expenditures during the reporting period, and the unexpended balance of funds under the grant agreement.

An authorized representative of the Contractor shall sign the forms. Each form shall be accompanied by:

1. All receipts and any other source documents for direct expenditures and costs that the Contractor has incurred.
2. Original invoices from Contractors that the Contractor engaged to complete any portion of the work funded under this agreement and any receipts and any other source documents for costs incurred and expenditures by any such Contractor, unless the Executive Officer makes a specific exemption in writing.
3. Written substantiation of completion of the portion of the project for which the Contractor is requesting disbursement.

With each form, the Contractor shall submit a supporting progress report summarizing the current status of the project and comparing it to the status required by the work program (budget, timeline, tasks, etc.). The Contractor's failure to fully execute and submit a Request for Disbursement form, including attachment of supporting documents, will relieve the OPC of its obligation to disburse funds to the Contractor until the Contractor corrects all deficiencies.

PROJECT COMPLETION

Within ninety days of completion of the project, the Contractor shall supply the OPC with evidence of completion by submitting a final report which includes:

1. All deliverables identified in the work program;
2. A fully executed final "Request for Disbursement" form.

Within thirty days of the Contractor's compliance with this paragraph, the OPC shall determine whether the Contractor has satisfactorily completed the project. If so, the OPC shall issue to the Contractor a letter of acceptance of the project. The project shall be deemed complete as of the date of the letter.
