To Whom It May Concern:

I cannot believe you would even consider allowing another intrusive facility being built on this coastline. We, as you know, have the power plant and the sanitation plant here.

From what I read, the water produced by this desalinization plant will not be available to the city of Huntington Beach. Why would you allow another destruction of our ocean be placed in this 1/2 mile stretch of our precious beach front.

I thought your job was to protect our valuable coast and ocean. Please do your job and do not allow this company or any other company to build a fish killing plant in this area. We have enough of this. I don't know anyone who lives here who wants this to happen. Put it in Huntington Harbor where the people live who are voting for the building of this plant.

Yours truly,

Sandy Gill
